

CONSTRUCTION AND DEMOLITION DEBRIS WASTE MANAGEMENT PLAN

Management of construction and demolition debris (C&D) waste is very important to Half Moon Bay's recycling program. The California Integrated Waste Management Board (CIWMB) has imposed stringent recycling requirements on every city in California, which include the mandate that every city and county recycle 50 percent of its waste in the year 2000 and beyond, or face stiff penalties for not doing so. Half Moon Bay encourages the proper management of waste collected at construction sites, and thanks you in advance for your cooperation in helping our city meet the recycling requirements.

Under City Ordinance 14.50, all persons taking out a building permit valued at more than \$5,000 are required to complete a plan for managing the waste material at the construction site. We strongly encourage contractors to take advantage of the opportunities to recycle C&D waste and reduce their cost of disposal.

INSTRUCTIONS

The following are common examples of how construction waste is recycled:

1. Salvage materials and reuse them.
2. Crush concrete and asphalt for reuse.
3. Separate materials and take them to recyclers.
4. Separate materials and have them picked up by recyclers.
5. Haul mixed recyclables to a mixed debris recycling facility.
6. Other (describe):

On the chart below, indicate (by number) which of the methods listed above will be used, the types of materials, and the estimated amounts that will be recycled and disposed.
