City of Half Moon Bay: Advisory Measures C

Advisory Vote Only: Should the City draft and adopt an ordinance to allow and regulate commercial manufacturing of cannabis products on sites in the City's IND (Industrial) Zoning District and/or existing greenhouse sites in the City's A-1 (Agriculture/Exclusive Floriculture) Zoning District?

Rebuttal Argument for the Primary Argument Against:

This is an ADVISORY MEASURE ONLY to give the City Council guidance as to the community's opinions on cannabis manufacturing activities for potential future ordinances.

We support allowing well-regulated and limited local manufacturing activities - within the context of what is right for our unique community - as an extension of cultivation activities, in order to allow local farmers and entrepreneurs to access all aspects of the industry required to run sustainable businesses that will support our local economy.

The reality of any cannabis manufacturing facility is that no members of the public will have access to the operations or products produced at the facility. These products can only be accessed through regulated dispensaries after undergoing strict third party laboratory testing for quality assurance/consumer safety, and after passing through required tracking and distribution channels, as mandated by State regulations.

If our community chooses to allow limited manufacturing operations in industrial zones, locals and tourists alike would never know where there operations were located or what products were being produced. It would not have any effect on our families, children, and community - other than opening up more jobs, tax revenues, and economic development.

Regarding medical applications of concentrated cannabis products, the cannabis derivative products produced by cannabis manufacturers are the evolution of the cannabis industry. There is nothing medical about smoking raw plant material, and the true medical cannabis products are primarily produced with the cannabis oils made by manufacturers. It is the future of the cannabis industry from a medical perspective.
